

UPDATE

Public Register

Monmouthshire County Council have started working with partners to build the central public register for special procedures licences and approved premises and vehicles. This follows the Minister for Health and Social Services approving funding for the project.

Consultation

As we prepare to publish our consultation document, we are looking to host virtual and face-to-face consultation workshops. It is important that we receive your views on proposals for the licensing scheme in Wales and we hope these workshops will make this process easier for you. We anticipate that they will be no longer than two hours and are expected to be held in the first three months of 2023.

If you have a query on this, or are interested in attending a workshop and would also like to suggest convenient dates and times, please contact Dr Sarah Jones Sarah.Jones058@gov.wales
